Global Fixed Income

Monthly Report – July 2025

Portfolio Manager Comment

The summer month of July was relatively calm, with the month beginning with continued talk about tariffs, which initially pushed up risk premiums. During the latter part of the month, several deals were made on tariff levels, which has reduced concerns and thus lowered risk premiums again. Agreements have been reached with, among others, the EU, South Korea and Japan. Both the ECB and the Fed announced the key interest rate during the month, both of which left it unchanged, which was as expected. Statistics during the month showed strong job figures in the US and higher-than-expected inflation in Sweden, which has pushed up interest rates somewhat. Across the Swedish curve, approximately one interest rate cut has been priced out. The Swedish four-year swap rate is up 25 basis points during the month.

There have been relatively small movements in the credit market during the month for investment grade, with index spreads tightening around 1 basis point in both Europe and the US. European high yield has performed strongly with a compression of 15 basis points.

Investment Goal and Strategy

The fund is a global corporate credit fund denominated in Swedish Kronor. The fund invests in both Investment Grade and High Yield, with a minimum of 50% rated investment grade. The fund targets highly liquid exposure in European and North American credit, whilst keeping both currency and interest rate risk in Swedish Krona.

To this end credit exposure is assumed via index-based centrally cleared Credit Default Swaps (CDS). The Reference Indices of the CDS contracts are Itraxx Europe Main and CDX Investment Grade or High Yield North America. The exposure to each issuer is equally weighted, ensuring a well-diversified portfolio.

The fund takes positions that eliminate its exposure to companies that do not meet the sustainability requirements set up by Captor. The fund is classified as Article 8 according to the Disclosure Regulation.

Risk Metrics

Duration	3.73 years	CDS index EUR IG spread	53.28 bp
Credit duration (CDS)	5.22 years	CDS index USD IG spread	50.64 bp
		CDS index EUR HY spread	267.40 bp

Reasons To Invest

The fund is suitable for investors with home currency in Swedish Krona looking for attractive risk-adjusted returns through a well-diversified exposure to global Investment Grade and High Yield credit, with a minimum of 50% in investment grade. Whilst at the same time also keeping its exposure in Swedish Krona interest rates.

How To Invest In The Fund

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

Risk Profile

Interest rate risk and credit risk are the dominant risk factors in the fund. It is exposed to movements in interest rates affecting the fund's bond positions, and it is exposed to credit spreads of both its bond positions and its positions in CDS contracts.

Portfolio managers

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.
