

CAPTOR

Scilla Global Equity

Monthly Report – April 2025

Portfolio Manager Comment

All focus during the month has been on the possible trade war that may break out between the US and the rest of the world. This led to large stock market declines at the beginning of the month but was followed by a recovery during the rest of the month. The fund ended the month down -1.3% (class C), the fund's benchmark down -0.3% and the global market-cap weighted index down -3.0%.

It is clear during the month that US companies have had relatively weak performance compared to the rest of the world. This has also been increased by the weakening of the dollar during the month. The weakest sectors for the fund during the month have been technology and consumer staples, both of which are dominated by US companies. Consumer staples and communications have had the largest positive contribution during the month for the fund. There are only two markets that have had a negative contribution during the month, which are USA and Singapore. The markets with the largest positive contribution have been Canada and Switzerland. In the currency market, there has been a mixed picture for the Swedish krona, with SEK appreciated most against USD (+3.7%) and NOK (+2.6%) and depreciated most against CHF (-3.2%) and EUR (-1.2%).

Investment Goal and Strategy

Captor Scilla Global Equity is an actively managed fund that invests globally in developed market equities. The fund is based on Captor's investment strategy Scilla. The strategy invests in companies that offer an attractive ratio between expected return and risk, compared to the global market as a whole. The fund excludes from its universe companies that does not comply with Captor's ESG screening criteria, and screens its positions continuously.

Furthermore the strategy can shift the total equity exposure of the fund. In volatile markets the fund can hold up to 50% in cash or high grade bonds, and apply up to 20% leverage in calmer markets. The selection method means that the strategy is exposed to 200-300 companies, which is approximately one fifth of the fund's investable universe. The fund's strategy is tuned only slightly over time while the fundamental strategy stays the same.

Reasons To Invest

Captor Scilla Global Equity is suitable for those who want an allocation to global equities and at the same time have a stable level of risk.

How To Invest In The Fund

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

Risk Profile

The fund aims to have lower volatility than the corresponding market value-weighted investment over time, primarily reducing large sequential drawdowns in in times of stressed markets.

Portfolio managers

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.

daniel.karlgren@captor.se

William Sjöberg holds a MSc from KTH in Stockholm with financial mathematics focus and an education in quantitative finance from the CQF Institute. William has previously worked at Nordea for eight years in derivatives covering several asset classes.
