

PORTFOLIO MANAGER COMMENT

The question of whether there is a war or a ceasefire between the US and Iran has been widely debated during the month. Interest rates markets, like other markets, have been torn between hope and despair, but as usual, the Interest rate market is the least optimistic. Overall, April saw small interest rate changes, down a few points at the short end. The curve is a couple of basis points steeper than last month, but the curve still prices the risk of future inflation. Energy prices always drive inflation, but we have continued weak structural consumption pressure in the Swedish economy. Households simply have not caught up since the interest rate hikes in 2022 – 2023.

The Swedish one-year swap rate is down 4 basis points to 2.47%. The credit market has delivered a more positive attitude than the fixed income market. The European investment grade credit index has compressed 11 basis points and the US 10 basis points.

INVESTMENT GOAL AND STRATEGY

The fund targets highly liquid exposure in European and North American Investment Grade credit, whilst keeping both currency and interest rate risk in Swedish Krona. To this end credit exposure is assumed via index-based centrally cleared Credit Default Swaps (CDS). The Reference Indices of the CDS contracts are Itraxx Europe Main and CDX Investment Grade North America. The exposure to each issuer is equally weighted, ensuring a well-diversified portfolio.

The fund takes positions that eliminate its exposure to companies that do not meet the sustainability requirements set up by Captor. The fund is classified as Article 8 according to the Disclosure Regulation.

The fund's capital will be invested in AAA rated SEK bonds, primarily Swedish covered bonds. Interest rate exposure is assumed via these bonds and cleared interest rate swaps in Swedish Krona.

REASONS TO INVEST

The fund is suitable for investors with home currency in Swedish Krona looking for attractive risk-adjusted returns through a well-diversified exposure to global investment grade credit. The strategy is suitable for investors looking for liquidity in all market conditions.

By construction the strategy effectively avoids being directly exposed to EUR or USD long term interest rates. In addition, the fund avoids all costs typically associated with hedging foreign currency back into Swedish Krona.

HOW TO INVEST IN THE FUND

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

RISK PROFILE

Credit risk is the dominant risk factor in the fund. It is exposed to credit spreads of both its bond positions and its position in CDS contracts.

PORTFOLIO MANAGERS

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.
