

ASTER GLOBAL CREDIT SHORT TERM

MONTHLY REPORT - JULY 2026

PORTFOLIO MANAGER COMMENT

The conflict involving Iran flared up again during the month, reversing the previous trend of declining interest rates and risk premia. Brent crude oil briefly traded above USD 100 per barrel but fell back towards the end of the month as tensions eased somewhat. Economic data were generally in line with expectations, with the exception of the U.S. CPI, which recorded a larger-than-expected monthly decline—the sharpest since 2020. The major central banks kept their policy rates unchanged, although the Federal Reserve struck a dovish tone at its meeting late in the month. This pushed short-term yields lower while long-term yields rose, resulting in a pronounced steepening of the yield curve.

In Sweden, short-term rates did not decline; instead, the curve largely shifted upwards in parallel, with the four-year swap rate recording the largest move, rising by 41 basis points. The Swedish one-year swap rate increased by 28 basis points during the month to 2.42%. IG spreads have widened during the month, the European credit index by 3 basis points to 54 basis points and the US also by 3 basis points to 53 basis points.

INVESTMENT GOAL AND STRATEGY

The fund targets highly liquid exposure in European and North American Investment Grade credit, whilst keeping both currency and interest rate risk in Swedish Krona. To this end credit exposure is assumed via index-based centrally cleared Credit Default Swaps (CDS). The Reference Indices of the CDS contracts are Itraxx Europe Main and CDX Investment Grade North America. The exposure to each issuer is equally weighted, ensuring a well-diversified portfolio.

The fund takes positions that eliminate its exposure to companies that do not meet the sustainability requirements set up by Captor. The fund is classified as Article 8 according to the Disclosure Regulation.

The fund's capital will be invested in AAA rated SEK bonds, primarily Swedish covered bonds. Interest rate exposure is assumed via these bonds and cleared interest rate swaps in Swedish Krona.

REASONS TO INVEST

The fund is suitable for investors with home currency in Swedish Krona looking for attractive risk-adjusted returns through a well-diversified exposure to global investment grade credit. The strategy is suitable for investors looking for liquidity in all market conditions.

By construction the strategy effectively avoids being directly exposed to EUR or USD long term interest rates. In addition, the fund avoids all costs typically associated with hedging foreign currency back into Swedish Krona.

HOW TO INVEST IN THE FUND

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

RISK PROFILE

Credit risk is the dominant risk factor in the fund. It is exposed to credit spreads of both its bond positions and its position in CDS contracts.

PORTFOLIO MANAGERS

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.
