

ASTER GLOBAL HIGH YIELD

MONTHLY REPORT – FEBRUARY 2026

CAPTOR

PORTFOLIO MANAGER COMMENT

Communication from the Riksbank about a possible interest rate cut and a slowing inflation rate has slowly led to lower interest rates in Sweden. Looking ahead, the market is simultaneously stimulated by lowered mortgage requirements and reduced food VAT. The market is uncertain about how all this will play out and is currently pricing in a 50% probability of an interest rate cut this year but at the same time a high probability of a quick increase after that. Long forward rates are down about 25 basis points.

After last year’s problems in the private credit market, investors have tried to get money back in a number of semi-liquid funds in the US. This has led to problems that we have previously seen in the Swedish credit market where an investment is sold with the promise of better liquidity than the underlying market can bear. In the US, this traditionally institutional market has been opened to smaller investors who have been offered liquidity in their investments, which of course has led to problems when they want to use this liquidity when they feel worried about the market.

The Swedish four-year swap rate has fallen 19 basis points during the month to 2.18%. It has been a turbulent month in the credit markets. The US high yield index is trading 35 basis points higher and the European high yield index 15 basis points higher than last month.

INVESTMENT GOAL AND STRATEGY

The fund targets highly liquid exposure in European and North American High Yield credit, whilst keeping both currency and interest rate risk in Swedish Krona. To this end credit exposure is mainly assumed via index-based centrally cleared Credit Default Swaps (CDS). The Reference Indices of the CDS contracts are Itraxx Europe Crossover and CDX North America High Yield. The exposure to each issuer is equally weighted, ensuring a well-diversified portfolio.

The fund is also allowed to invest directly in corporate bonds with the corresponding rating. When the exposure to corporate credit is assumed through CDS contracts, the capital of the fund is simultaneously in AAA rated SEK bonds, primarily Swedish covered bonds.

The fund takes positions that eliminate its exposure to companies that do not meet the sustainability requirements set up by Captor. The fund is classified as Article 8 according to the Disclosure Regulation.

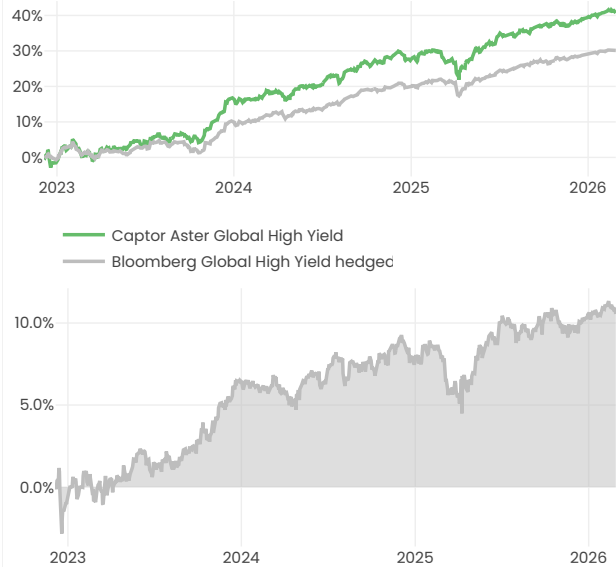

RISK METRICS

Duration	4.04 years
Credit duration (CDS)	4.88 years
Spread against swap	3.32%
CDS index EUR HY spread	261.46 bp
CDS index USD HY spread	330.89 bp

REASONS TO INVEST

The fund is suitable for investors with home currency in Swedish Krona looking for attractive risk-adjusted returns through a well-diversified exposure to global high yield credit. The strategy is suitable for investors looking for liquidity in all market conditions.

By construction the strategy effectively avoids being directly exposed to EUR or USD long term interest rates. In addition, the fund avoids all costs typically associated with hedging foreign currency back into Swedish Krona.

HOW TO INVEST IN THE FUND

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

RISK PROFILE

Credit risk is the dominant risk factor in the fund. It is exposed to credit spreads of both its bond positions and its position in CDS contracts.

PORTFOLIO MANAGERS

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.
