

PORTFOLIO MANAGER COMMENT

After a quiet late summer marked by uncertainty regarding the situation in the Strait of Hormuz, volatility returned to the interest rate market last week. Interest rates, already high globally, rose rapidly by a few additional basis points. The US Federal Reserve Chair did not appear quite as dovish as expected in his Jackson Hole speech. The ECB has also signaled a tighter policy stance for the autumn. Eurozone countries—and perhaps the US in particular—face a tricky situation where expansionary, unfunded fiscal policy is driving inflation. Unlike in Sweden, both residential and corporate financing rely on long-term, fixed-rate structures, meaning the impact of interest rate adjustments takes longer to materialize. US national debt surpassed \$40 trillion during the month, and the pace of borrowing is accelerating as Trump's tariffs fail to generate revenue anywhere near the levels promised. The Swedish four-year swap rate closed the month at 2.92%, approaching the peaks seen during the inflation concerns of 2022–2023.

Despite rising interest rates, credit spreads have not widened during the month. The European high-yield index is trading at 247 basis points, and the US index at 299 basis points. Both indices have tightened by around 15 basis points during the month.

INVESTMENT GOAL AND STRATEGY

The fund targets highly liquid exposure in European and North American High Yield credit, whilst keeping both currency and interest rate risk in Swedish Krona. To this end credit exposure is mainly assumed via index-based centrally cleared Credit Default Swaps (CDS). The Reference Indices of the CDS contracts are Itraxx Europe Crossover and CDX North America High Yield. The exposure to each issuer is equally weighted, ensuring a well-diversified portfolio.

The fund is also allowed to invest directly in corporate bonds with the corresponding rating. When the exposure to corporate credit is assumed through CDS contracts, the capital of the fund is simultaneously in AAA rated SEK bonds, primarily Swedish covered bonds.

The fund takes positions that eliminate its exposure to companies that do not meet the sustainability requirements set up by Captor. The fund is classified as Article 8 according to the Disclosure Regulation.

REASONS TO INVEST

The fund is suitable for investors with home currency in Swedish Krona looking for attractive risk-adjusted returns through a well-diversified exposure to global high yield credit. The strategy is suitable for investors looking for liquidity in all market conditions.

By construction the strategy effectively avoids being directly exposed to EUR or USD long term interest rates. In addition, the fund avoids all costs typically associated with hedging foreign currency back into Swedish Krona.

HOW TO INVEST IN THE FUND

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

RISK PROFILE

Credit risk is the dominant risk factor in the fund. It is exposed to credit spreads of both its bond positions and its position in CDS contracts.

PORTFOLIO MANAGERS

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.
