

DAHLIA GREEN BOND

MONTHLY REPORT - AUGUST 2026

PORTFOLIO MANAGER COMMENT

After a quiet late summer marked by uncertainty regarding the situation in the Strait of Hormuz, volatility returned to the interest rate market last week. Interest rates, already high globally, rose rapidly by a few additional basis points. The US Federal Reserve Chair did not appear quite as dovish as expected in his Jackson Hole speech. The ECB has also signaled a tighter policy stance for the autumn. Eurozone countries—and perhaps the US in particular—face a tricky situation where expansionary, unfunded fiscal policy is driving inflation. Unlike in Sweden, both residential and corporate financing rely on long-term, fixed-rate structures, meaning the impact of interest rate adjustments takes longer to materialize. US national debt surpassed \$40 trillion during the month, and the pace of borrowing is accelerating as Trump's tariffs fail to generate revenue anywhere near the levels promised. The Swedish four-year swap rate closed the month at 2.92%, approaching the peaks seen during the inflation concerns of 2022–2023.

The Swedish bond market has remained dormant throughout August. On the sustainability front, only a few new bonds have appeared—primarily in the AAA segment of the market, specifically covered bonds and municipal bonds.

INVESTMENT GOAL AND STRATEGY

Captor Dahlia Green Bond is an actively managed bond fund that invests in green bonds and bonds with other sustainability themes. The fund is classified as Article 9 ("dark green") according to the Disclosure Regulation. The fund's screening process aims to ensure that holdings adhere to international standards and conventions such as the UN Global Compact and OECD guidelines for multi-national enterprises.

The fund's goal is to be fully invested in green bonds, but from time to time the fund will invest in high grade covered bonds pending suitable green investments. This means that the proportion of green bonds can vary slightly over time. The fund uses interest rate and currency swaps to ensure efficient position taking independent from credit positions.

REASONS TO INVEST

Captor Dahlia Green Bond is suitable for investors who are looking for active fixed income management in green bonds that finance projects for a more sustainable society.

HOW TO INVEST IN THE FUND

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

RISK PROFILE

The fund's investment strategy is focused on building a robust portfolio by balancing credit risk against interest rate risk. These two risks are the main risks of the fund, while they tend to be negatively correlated in stressed markets. The fund targets a bond portfolio with an average credit rating of "single A".

PORTFOLIO MANAGERS

Cecilia has over 30 years of experience in trading financial instruments. She has worked at AGA AB and at Nordea Markets, where she has been in the corporate bond market since the first credit bonds were issued. At Nordea, she had a role as advisory manager for bond portfolios.

cecilia.dahlstedt.myrgard@captor.se

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.
