

PORTFOLIO MANAGER COMMENT

The question of whether there is a war or a ceasefire between the US and Iran has been widely debated during the month. Interest rates markets, like other markets, have been torn between hope and despair, but as usual, the Interest rate market is the least optimistic. Overall, April saw small interest rate changes, down a few points at the short end. The curve is a couple of basis points steeper than last month, but the curve still prices the risk of future inflation. Energy prices always drive inflation, but we have continued weak structural consumption pressure in the Swedish economy. Households simply have not caught up since the interest rate hikes in 2022 – 2023.

The Swedish ten-year swap rate is down 2 basis points to 3.06%. Swedish covered bond spreads have compressed during the month; the five-year spread is down about 8 basis points and is trading around 31 basis points over swap.

INVESTMENT GOAL AND STRATEGY

Captor Iris Bond is an actively managed fixed income fund. The capital is invested in ECBC covered bonds and bonds issued or guaranteed by Northern European sovereigns, local governments and supranationals. The fund will invest in green bonds provided that they fit within the investment strategy. The fund further utilises interest rate swaps to take positions in long maturity Swedish interests rates. As part of the strategy to maintain these positions the fund also trades in swaptions.

REASONS TO INVEST

The fund has long duration and is therefore able to earn the risk premia available further out on tradable Swedish Krona interest rate curves. This strategy has over time offered an attractive risk-adjusted return. The performance of these positions tend to be negatively correlated with those of risky assets such as equities, especially in times of market stress. Therefore the fund can be an attractive component in a balanced portfolio. The fund is also appropriate for investors with long dated liabilities.

HOW TO INVEST IN THE FUND

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

RISK PROFILE

The fund has a higher sensitivity to changes in interest rates, i.e. a higher "duration", compared to other fixed income funds available in Swedish Krona. Interest rate risk is the dominant riskfactor of the fund, larger than the credit exposure of the fund, given that the fund's capital is invested in ECBC covered bonds and bonds issued or guaranteed by Northern European sovereigns, local governments and supranationals.

PORTFOLIO MANAGERS

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.
