

# IRIS BOND

## MONTHLY REPORT - AUGUST 2026

### PORTFOLIO MANAGER COMMENT

After a quiet late summer marked by uncertainty regarding the situation in the Strait of Hormuz, volatility returned to the interest rate market last week. Interest rates, already high globally, rose rapidly by a few additional basis points. The US Federal Reserve Chair did not appear quite as dovish as expected in his Jackson Hole speech. The ECB has also signaled a tighter policy stance for the autumn. Eurozone countries—and perhaps the US in particular—face a tricky situation where expansionary, unfunded fiscal policy is driving inflation. Unlike in Sweden, both residential and corporate financing rely on long-term, fixed-rate structures, meaning the impact of interest rate adjustments takes longer to materialize. US national debt surpassed \$40 trillion during the month, and the pace of borrowing is accelerating as Trump's tariffs fail to generate revenue anywhere near the levels promised. The Swedish ten-year swap rate closed the month at 3.22%, approaching the peaks seen during the inflation concerns of 2022–2023.

Covered bond spreads are trading unchanged for the month; the four-year spread stands at approximately 20 basis points.

### INVESTMENT GOAL AND STRATEGY

Captor Iris Bond is an actively managed fixed income fund. The capital is invested in ECBC covered bonds and bonds issued or guaranteed by Northern European sovereigns, local governments and supranationals. The fund will invest in green bonds provided that they fit within the investment strategy. The fund further utilises interest rate swaps to take positions in long maturity Swedish interests rates. As part of the strategy to maintain these positions the fund also trades in swaptions.

### RISK METRICS

|                     |             |
|---------------------|-------------|
| Duration            | 11.34 years |
| Credit duration     | 3.88 years  |
| Spread against swap | 0.37%       |

## REASONS TO INVEST

The fund has long duration and is therefore able to earn the risk premia available further out on tradable Swedish Krona interest rate curves. This strategy has over time offered an attractive risk-adjusted return. The performance of these positions tend to be negatively correlated with those of risky assets such as equities, especially in times of market stress. Therefore the fund can be an attractive component in a balanced portfolio. The fund is also appropriate for investors with long dated liabilities.

## HOW TO INVEST IN THE FUND

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

## RISK PROFILE

The fund has a higher sensitivity to changes in interest rates, i.e. a higher "duration", compared to other fixed income funds available in Swedish Krona. Interest rate risk is the dominant riskfactor of the fund, larger than the credit exposure of the fund, given that the fund's capital is invested in ECBC covered bonds and bonds issued or guaranteed by Northern European sovereigns, local governments and supranationals.

## PORTFOLIO MANAGERS

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.
