

SCILLA GLOBAL EQUITY

MONTHLY REPORT – FEBRUARY 2026

PORTFOLIO MANAGER COMMENT

February was a very positive month for the fund. There has been a rotation between companies expected to benefit and suffer from AI developments, which has been positive for the fund's holdings. At the same time, the US dollar has strengthened, which has extended the positive performance. The fund ended the month up +7.0% (class C), the fund's benchmark index up +7.0% and the global market-weighted index up +3.1%.

There has been an overall positive movement among the fund's sector exposures. The best sector has been real estate, where the fund's holdings are up around +13% on average in local currency. The largest positive contributions have come from financials, industrials and consumer staples, while technology has been the weakest sector and the only one with a negative contribution during the month. Grouped by country, there has been an overall positive performance, with all markets having a positive contribution. Sweden and Hong Kong have been the best markets, measured in local currency, with an average increase of +9.5% and +9.1% respectively. Europe accounts for the largest positive contribution during the month. In the foreign exchange market, the Swedish krona has weakened against all currencies in the fund. SEK weakened the most against AUD (-3.9%), NOK (-2.9%) and USD (-2.4%).

The following companies had the largest movements during the month: Ahold Delhaize (+27%), Toromont Industries (+22%) and Boston Scientific (-18%). The fund currently has an equity exposure of 106%.

INVESTMENT GOAL AND STRATEGY

Captor Scilla Global Equity is an actively managed fund that invests globally in developed market equities. The fund is based on Captor's investment strategy Scilla. The strategy invests in companies that offer an attractive ratio between expected return and risk, compared to the global market as a whole. The fund excludes from its universe companies that does not comply with Captor's ESG screening criteria, and screens its positions continuously.

Furthermore the strategy can shift the total equity exposure of the fund. In volatile markets the fund can hold up to 50% in cash or high grade bonds, and apply up to 20% leverage in calmer markets. The selection method means that the strategy is exposed to 200-300 companies, which is approximately one fifth of the fund's investable universe. The fund's strategy is tuned only slightly over time while the fundamental strategy stays the same.

DISCLAIMER

The information provided herein is generally descriptive and the fund may not be available for or suitable for you. Any opinions expressed do not constitute investment advice. Independent advice should be sought in cases of doubt. The value of the fund and any securities mentioned herein can fall as well as rise and an investor may get back less than the capital invested. Past performance is not necessarily a guide to future performance. Please go to <https://captor.se/fonder/> for further information.

REASONS TO INVEST

Captor Scilla Global Equity is suitable for those who want an allocation to global equities and at the same time have a stable level of risk.

HOW TO INVEST IN THE FUND

Some of the fund's share classes are available through Swedish banks and fund platforms. Furthermore, some share classes have a higher minimum investment, and for such share classes a dilution levy can be applied at subscription/redemption in order to protect the fund's shareholders. The process is the same as employed by exchange traded funds and also allows for physical creations/redemptions.

RISK PROFILE

The fund aims to have lower volatility than the corresponding market value-weighted investment over time, primarily reducing large sequential drawdowns in times of stressed markets.

PORTFOLIO MANAGERS

Daniel has fifteen years of experience in trading fixed income, equity and currency products. He has previously worked as a quantitative analyst and asset manager at Handelsbanken and built up and managed a derivative portfolio at Industrivärden.
